

---

Jd

commercial database product  
from Jsoftware

released one month ago

---

free non-commercial use

easy to install (JAL)

tutorials/demos/docs

forum support

---

analytics

somewhat static database  
sourced from other databases

fast complex queries

---

medium data

- tables with 100e6 rows
- scales well with more ram
- unlimited cols
- many tables - all join types

---

structured data

- numeric or strings
- not unstructured text blobs

---

fast CSV loader

fast bulk insert

easy updates  
but not high rate

---

fast CSV loader - easy to use

- configurable
- rowsep/colsep
- quoted/escape chars
- load X rows
- load certain columns
- ...

---

Jd col is a jmf file

map col as a J noun

use col data without Jd

---

suggest you use Jd  
for all your csv work

learning curve  
thereafter you'll be ahead
